

PIYUSH MAHESHWARI

Mobile Application Developer (Android & Flutter)

Navi Mumbai, Maharashtra, India | 7021507179 |
maheshwaripiyush99.pm40@gmail.com

PROFESSIONAL SUMMARY

Results-oriented Mobile Application Developer with 6+ years of hands-on experience designing and deploying scalable Android (Java/Kotlin) and Flutter applications. Specialized in offline-first architecture, Firebase real-time systems, and performance-critical integrations, with a proven track record of delivering end-to-end products as a solo developer. Adept at architecting production-grade POS systems, OTT platforms, e-commerce solutions, and SAP-integrated enterprise mobility systems to streamline high-volume operations across multi-branch environments.

TECHNICAL SKILLS

- **Programming Languages:** Java, Kotlin, Dart, C, C++
- **Frameworks & SDKs:** Flutter, Android SDK
- **Architecture & Design:** MVVM, Clean Architecture, Offline-First Architecture
- **Databases:** Room DB, SQLite, Hive, MySQL, Oracle
- **Cloud & Tools:** Firebase (Firestore, Messaging, Crashlytics), Google Maps SDK, Git, Software Testing
- **APIs & Integrations:** REST APIs, Retrofit, Payment Gateways (CCAvenue), POS Hardware Integration (Sunmi, Star Printers), SAP Integration

PROFESSIONAL EXPERIENCE

ASA Technologies

Mobile Application Developer (Android & Flutter) | December 2022 – Present

- Architected and deployed the **RUE Catering POS System (Flutter)** featuring an offline-first architecture with real-time backend synchronization, ensuring zero downtime and processing over 100 daily transactions per branch across 3 outlets.
- Developed a native **Android Kitchen Order Ticket (KOT) system** utilizing Firebase for live order streaming, implementing conditional automated receipt printing and routing across 5+ kitchen displays to drastically reduce order turnaround times.

- Engineered the **Alhelli Warehouse PDA Application**, an offline-first Android solution utilizing Room DB, seamlessly integrated with SAP to process high-volume barcode scanning for stock intake, goods receipt, and verification without network dependency.
- Built the **Inwani Real Estate Super App (Flutter)** with a modular Clean Architecture, supporting dual-language UI (English/Arabic), dynamic multi-region API routing (KSA/Bahrain), and secure JWT (AES-GCM) biometric authentication.
- Spearheaded the development of the **ASA App**, an end-to-end organizational attendance and task management suite, integrating real-time reporting dashboards and maintaining comprehensive technical documentation to ensure scalable enterprise deployment.

INTERLINK CONSULTANT

Android Developer | September 2021 – November 2022

- Developed the **Forlim Popoli E-Commerce App**, implementing end-to-end order lifecycle management, barcode-based article handling, and integrating the CCAvenue payment gateway for split payment workflows (Pay Now/Pay Later).
- Built the **Regal Fashion Field Sales Application** to optimize multi-branch stock management, allowing distributed sales teams to check real-time inventory, place orders, and share automated client reports.
- Designed the **ConnectExpress Workforce Tracking App** leveraging Google Maps SDK and geolocation services to validate field executive attendance, capture location-stamped customer feedback, and handle thousands of operational records.
- *Additional Projects:* Delivered robust enterprise modules for SeaConnector (Candidate & Recruiter Apps), Kay Jewels (Billing/Visitor), KMS Billing, and C-RISH Pharma.

CRDR INFOTECH PVT LTD

Android Developer | March 2018 – September 2019

- Collaborated in a 3-member agile team to develop and maintain scalable enterprise applications, including Human Resource Management Systems (HRMS), Project Management Systems (PMS), and Leave Management portals.
- Led the end-to-end mobile development lifecycle for two major client deployment projects, ensuring seamless REST API integrations and robust application stability across multiple business modules.

KEY PROJECTS & FREELANCE INITIATIVES

- **NUVIX (OTT Streaming Platform):** Engineered a comprehensive Flutter-based streaming platform. Developed a custom video engine with smart server failover logic and built a resilient background download manager with pause/resume functionality and local storage optimization. Automated content workflows using the TMDB API.
- **SmartBill (POS & Invoicing System):** Built a high-integrity POS system using Flutter and Firebase, featuring real-time inventory management via Firebase transactions. Designed an immutable document architecture (Snapshot Pattern) for accurate financial auditing and developed a dynamic PDF generation engine for scalable A4 invoices and thermal shipping labels.
- **ServiceKeeda EV Charging App (Freelance):** Developed a complete Android application for real-time EV station discovery and booking. Integrated Google Maps for spatial filtering and implemented a full payment flow (wallet/credit/net banking) alongside charging analytics, booking history, and notification systems.

EDUCATION

- **Master in Computer Science (Pursuing)** | *Bir Tikendrajit University*
- **B.Tech in Computer Science Engineering (CSE)** | *Kalinga University* | July 2018 – June 2021
- **Diploma in Computer Science** | *Kalinga University* | July 2015 – June 2018
- **Secondary School Graduate** | *S.M. Batha High School* | June 2014

CERTIFICATIONS

- **Comprehensive Technical Training** (C, C++, Java, Android, Oracle DBA, Software Testing) | *Seed Infotech* | July 2014 – April 2017
- **Certificate Course in Basic Programming (CCBP)** | *Academy of Information Technology (YCP)* | April 2014 – June 2014
